

Cork Pads & Foam Spacers Sample Card

Our contribution to safety:

ASTORplast cork- and foam pads are ideally suited as shock absorbers and slip-resistant spacers.

The application-specific properties offer a wide range of application possibilities.

ASTORplast cork pads

ASTORplast cork pads for storing and transporting glass and surfaces that need protection, such as plastics, metals and painted surfaces.

Product properties:

- ▶ grinded, adhesive-bonded compressed cork
- ▶ withstands high pressure

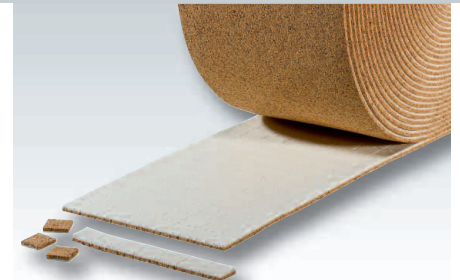

ASTORKORK

Carrier: Cork
low tack
Delivered as: punched parts, lined up on roll
Standard cork thickness: 2 mm / 3 mm / 4 mm

ASTORKOMBIKORK

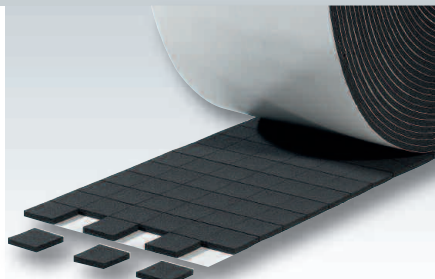

Carrier: Cork
with self-adhesive foam
Delivered as: punched parts, lined up on roll
Standard cork thickness: 2 mm / 3 mm

ASTORplast foam spacers

ASTORplast spacers for window and door construction. The requirements for surfaces needing protection during storing and transporting, as well as for window and door frames are met. For protecting glass, plastics, metal, wood, etc.

ASTORFLEX

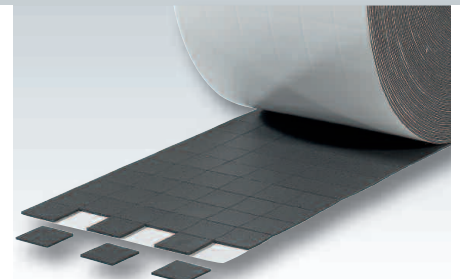

Carrier: cellular rubber
low tack / strong tack
Delivered as: punched parts, lined up on roll, slab or loosely poured
Standard thickness: on roll 2 – 6 mm, on sheet 8 – 15 mm, loose in cardboard 2 – 15 mm

- Product features:
- ▶ closed-cell cellular rubber
 - ▶ good inner firmness
 - ▶ slip-resistant surface
 - ▶ medium elasticity
 - ▶ low tack: removable without residue

ASTORPOL/J

Carrier: polyethylene
low tack / strong tack
Delivered as: punched parts, lined up on roll, slab or loosely poured
Standard thickness: on roll 2 – 6 mm, on sheet 8 – 15 mm, loose in cardboard 2 – 15 mm

- Product features:
- ▶ chemically interlaced polyethylene foam
 - ▶ no surface discolorations
 - ▶ low tack: removable without residue

- ▶ Economical because transport damage is prevented
- ▶ Easy handling
- ▶ Safe in "stacking, storing and transport" applications
- ▶ Customer-specific dimensions and forms of delivery

ASTORKombikork

Carrier: cork
with self-adhesive foam
Delivered as: punched parts, foam on foam
Standard cork thickness: 2 mm / 3 mm

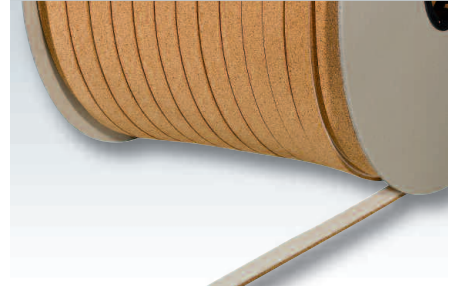

ASTORKombikork

for LENHARDT cork applicator
Carrier: cork
with self-adhesive foam with foil liner
Delivered as: punched parts, lined up on roll
or bobbin
Standard cork thickness: 3 mm

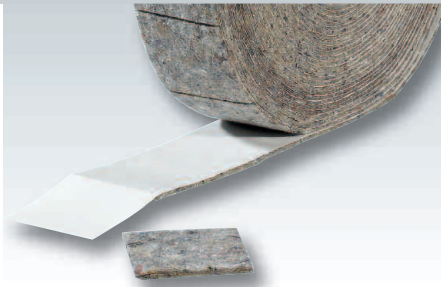

ASTORKombikork

for LISEC cork applicator
Carrier: cork
with self-adhesive foam
Delivered as: cork band, on roll or bobbin
Standard cork thickness: 3 mm

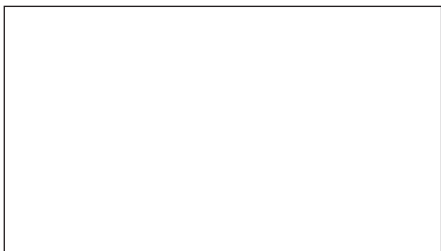

ASTORfilz

Carrier: grey felt
low tack / strong tack
Delivered as: punched parts, lined up on roll
Standard thickness: 3 mm

Product features:
▶ soft
▶ low tack: removable without residue

ASTORKork

Carrier: cork
low tack / strong tack
Delivered as: punched parts, lined up on roll or
sheets
Standard cork thickness: on roll 1 – 6 mm,
on slab 8 – 20 mm

Product features:
▶ grinded, adhesive-bonded compressed cork
▶ withstands high pressure
▶ strong adhesive, for applying on protective foil

When using on subsurfaces other than glass, we recommend preliminary testing, as there can be adverse reactions in painted surfaces, for example. If no standard product fits your application, ASTORplast will gladly develop your optimal product together with you. For further information please contact our technical adviser. Specified dimensions are approximate. Punching tolerances according to DIN 7715-P3.

Our word is our bond

ASTORplast is a manufacturer of pressure-sensitive tapes and customer-specific stamps successful all over Europe. This corporate group has been producing customised adhesive solutions for more than 45 years for virtually every manufacturing industrial and commercial sector.

All of our work and ideas centre on the customer and his specific job. ASTORplast joins forces with its customers to apply our wide range of standard products and large portfolio of bonding agents, liners and substrate materials to put together efficient systems and product solutions.

ASTORplast takes advantage of the expertise of its own development departments in this process. Regular investments in productivity, automation and process reliability guarantee the highest level of product quality and technology at fair-market prices.

The ASTORplast Group is successful throughout Europe with ISO-certified production plants in Germany and Switzerland.
