

Die-cuts sample card

Customised die-cuts

ASTORplast produces dimensionally accurate, individual die-cuts that meet your specifications exactly from many different materials on efficient machines specially designed for the company.

The ASTORplast self-adhesive products or your own material webs are the basis for your die-cut.

The company's track record in many different industries and application areas makes ASTORplast a flexible and capable partner for individual die-cut solutions.

Die-cuts from ASTORplast carry out important functions in many different application areas:

- Automotive
 - Electronics
 - Machine and vehicle manufacturing
 - Building
 - Glass
 - Medicine
 - Sports products
 - Household equipment / appliances
 - Furniture
 - Leisure
 - Shoes
 - Fixtures and fittings manufacturing
 - Chemicals
 - Transportation
 - Heating / air conditioning / ventilation
 - Aerospace
 - Food and related products
 - Plumbing
 - Environmental engineering
 - Traffic technology
- and many others

Individual solutions from ASTORplast are the key to YOUR success

Whether small quantities or large volumes are required, capable ASTORplast staff develop YOUR specific, easily processed die-cut, from the smallest precision part – e.g. with a diameter of 1.5 mm for medical engineering purposes – to large parts with dimensions of 1 400 x 650 mm.

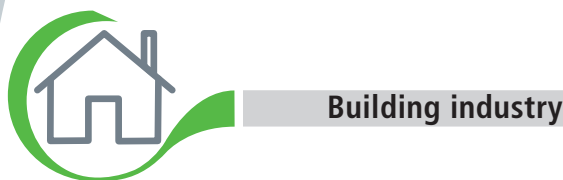

In its production operations, ASTORplast uses different cutting processes, depending on the material, dimensions, shape and degree of precision.

ASTORplast supplies your die-cut exactly the way you want it. Manufactured individually for many different application areas, self-adhesive or non-adhesive on one or both sides.

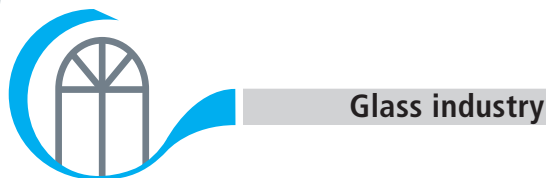

More than 40 years of practical experience in many different areas

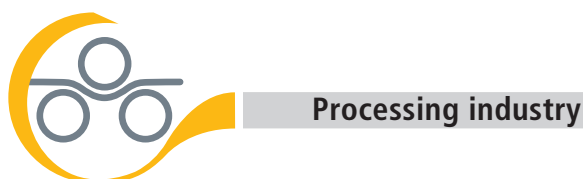

Transportation

Building industry

Glass industry

Processing industry

Development & partnership

It goes without saying that ASTORplast has obtained DIN EN ISO 9001:2000 certification.

Stripped waste removed

Configurations available

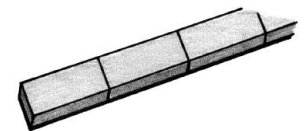

Loose die-cuts

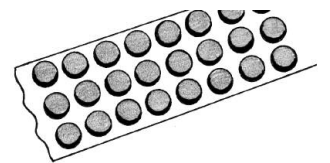

Transverse cutting on reels

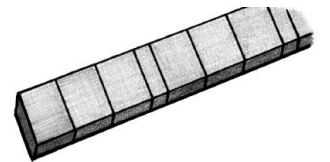

Longitudinal cutting on reels

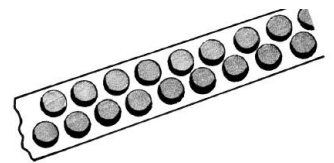

Cut in several lanes

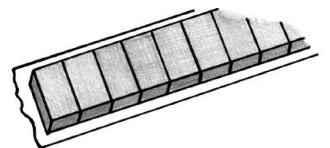

With an intermediate cut

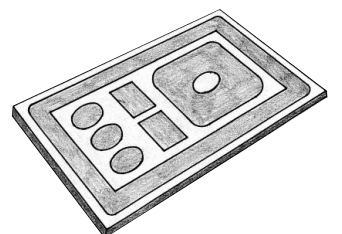

Staggered cutting

Projecting liner

Die-cut set

ASTORplast self-adhesive products: the basis for YOUR die-cut

The varied ASTORplast product portfolio is certain to provide the optimum basis for YOUR individual die-cut. Make your choice from the standard products or have your special solution developed. Your technical application advisor will be glad to give you capable assistance.

ASTORtex

Adhesive tape systems on the basis of

- Acrylate dispersion
- Synthetic rubber and
- UV-crosslinked acrylate adhesives

Supplied with different substrate materials and liners, depending on the application.

ASTORfoam

Foam made from PE / PVC / PUR or foam rubber that is self-adhesive and non-adhesive on one and both sides. Supplied with different adhesive systems, substrates and liners, depending on the requirements.

ASTORMount

Double-sided self-adhesive installation tapes. For bonding profiles, strips and mirrors. Manufactured from special PE and PUR foams. Coated with various adhesive systems and liners for many different applications.

ASTORdist

Cork stacking discs are ideal spacers for glass, plastics, wood and many other sensitive surfaces. Simple to use as transport and storage protection.

Available from 3 mm thick in composite cork form

- Already die-cut on reels
- Die-cut foam to foam
- Die-cut on spools / not die-cut für automatic Lisec and Lenhardt-Bystronic machines
- Low-adhesive cork (starting at 2 mm, die-cut on reels)

Special dimensions are possible if an appropriate quantity is ordered.

ASTORfoil

Self-adhesive aluminium and copper foil. Available with laid fabric or different adhesive systems and liners, depending on the application area.

ASTORspezial

Materials like felt, glass fibre tape or bitumen sheeting finished to be self-adhesive on one and both sides.

Our word is our bond

ASTORplast has been supplying standard products and special customised solutions in the technical adhesive tapes and self-adhesive products field for more than 40 years now.

The ASTORplast Group operates successfully throughout Europe, with production locations in Germany and Switzerland.

The products manufactured are used by practically all areas of industry and craft businesses that are involved in processing operations. Highly motivated and well-trained staff work in a purposeful and customer-oriented way to develop innovative solutions. Regular investments in productivity, automation and process reliability guarantee the highest possible product quality. Our decades of experience as well as our own and neutral quality controls guarantee consistently high product quality.

There is no clash between environmental protection and adhesive technology at ASTORplast. All of the products have already been completely solvent-free for decades.
